PROFILE

Detail-oriented and results-driven Software Engineer with a strong foundation in web development, AI, and API integration. Skilled in creating scalable, full-stack applications using modern technologies such as JavaScript (React.js, Node.js), Python, and Java. Adept at solving complex technical problems and optimizing workflows for efficiency. Passionate about delivering high-quality solutions that enhance user experiences, with a particular focus on accessibility and performance. Proven ability to collaborate in dynamic team environments, adapt to new technologies quickly, and consistently meet project goals.

CORE SKILLS

- Proficient in utilizing APIs within projects, including handling data retrieval, processing, and integration to enhance functionality and user experience.
- Skilled in leveraging AI, made multiple agents and chatbots, leveraging machine learning and natural language processing to create intelligent, responsive solutions.
- Confident in tackling complex challenges and troubleshooting with a resourceful, self-driven approach. Even when I don't initially know the answer, I am assured in my ability to research, adapt, and find the right solution to deliver high-quality, reliable outcomes.

WORK EXPERIENCE

Part-Time Office Assistant

Amelia GB LTD Accountancy 2019-Now

- Managed and organized financial data using Excel, ensuring accuracy and compliance with office standards.
- Designed and maintained spreadsheets to streamline accounting processes, including data entry, budget tracking, and report generation.
- Automated repetitive tasks in spreadsheets using formulas and basic macros, improving efficiency.

WORK EXPERIENCE
